

CASE STUDY

Orbit Housing

Client

Orbit Housing

Company Sector

Independent Living

Services Provided

Defibrillator Installations

Client Brief

To install self-testing defibrillators at 28 locations covering extra care and independent living sites that were considered to have a potential weakness regarding vulnerable customers. Defibrillators were supplied by St John Ambulance and CCSS carried out this work free of charge, installing the defibrillators, wall bracket and sign as part of our social value work.

Project Solution

Received instruction from Orbit to carry out the above work. Received Defibrillators from St Johns Ambulance. Built defibrillator kits. Scheduled programme of works. Liaised with Orbit Housing regarding time frame. Issued letters notifying customers of install date. Had Dibond signs manufactured to replace plastic stickers as a more permanent and professional fix. Fitted all 28 sites within the agreed deadline over a 5 day programme of works. Tested all equipment and recorded details of serial numbers for warranty purposes. Reported back to Orbit daily with an update of the days works with pictures of each site install.

Project Result

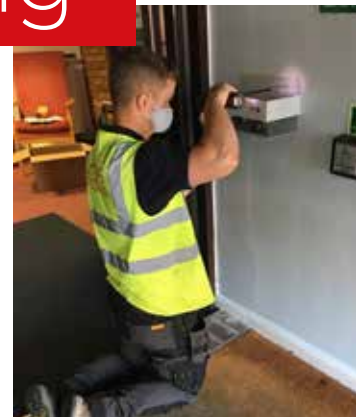

Project delivered on time and achieved all targets set by Orbit

Project Duration

The project plan was over several weeks. The programme of works occurred over 5 days

Value of Project

Corporate Social Responsibility (FOC)

I really appreciate your efforts and the incredible social value impact you have had here – you are literally helping save people's lives.

Clare Sykes, Social Impact Coordinator, Orbit Group

Great feedback received from Regional, Area Managers and Scheme Officers alike, even more-so that CCSS delivered this as full social value and zero storage and labour costs to Orbit. Excellent work team #saving lives.

Christian Halford, Capital Delivery Contracts Manager, Orbit Group
